

Preclinical in vivo Dermatology Study leader (M/F)

Fixed-term contract (temporary replacement) based in Vandœuvre-les-Nancy (54500).

ETAP-LAB is an independent preclinical research laboratory providing specialized services to the pharmaceutical, biotechnology, and agri-food industries. With more than 35 years of experience, ETAP-LAB has developed recognized scientific expertise in several therapeutic areas, including dermatology, cerebrovascular and cardiovascular diseases, and neurodegenerative disorders. Beyond science, we place particular emphasis on ethics, animal welfare, sustainability, and validation of the latest techniques.

POSITION OVERVIEW

Join a CRO recognized for its expertise in preclinical research, particularly in dermatology, and contribute to the development of innovative solutions for an international client base. As part of a dynamic team, you will leverage your scientific expertise and project management skills to ensure successful studies and client satisfaction.

Main responsibilities:

- Lead and coordinate preclinical dermatology projects, from study design to presentation of results to clients.
- Ensure the quality and regulatory compliance of all studies conducted.
- Manage resources, timelines, and budgets to achieve operational and financial project objectives.
- Develop trusted relationships with clients and scientific partners and contribute to their satisfaction.
- Supervise and support project teams while contributing to the continuous improvement of methods, processes, and the quality system.

EDUCATION

- Master's degree (or equivalent, Bac+5) in Science, Biology, or Health Sciences
- Certification level equivalent to Designer of Animal Experiments
- Additional training in general surgery

REQUIRED SKILLS AND QUALIFICATIONS

- Strong scientific rigor and organizational skills
- Analytical and synthesis capabilities
- Excellent interpersonal and communication skills in French and English

Minimum of 3 years of experience in preclinical dermatology development within a CRO or pharmaceutical company.

CONTRACT

Start date: As soon as possible. Temporary replacement fixed-term contract for a full-time employee through November 2, 2026.

Gross monthly salary: €3,000 to €3,500 depending on experience.

Occasional work on weekends and public holidays may be required.
